

Keyur Mistry

Flutter Developer

📞 +91 8866517763 — ✉ keyurmistry334@gmail.com — 🔗 LinkedIn — 🐙 GitHub

Career Objective

Flutter Developer and MSc IT student with practical experience in developing cross-platform mobile applications using Flutter, Firebase, and Supabase. Skilled in UI development, backend integration, REST APIs, and scalable application architecture. Passionate about building real-world user-friendly applications and continuously learning modern mobile development technologies.

Education

Charotar University of Science and Technology (CHARUSAT)	Aug 2024 – 2026
Master of Science in Information Technology	CGPA: 7.00/10
S. S. Agrawal College, Navsari (VNSGU)	Aug 2021 – 2024
Bachelor of Computer Applications	CGPA: 7.22/10

Work Experience

Flutter Developer Intern	December 2025 – June 2026
<i>Patrixel — Remote</i>	

- Developing and maintaining cross-platform mobile applications using Flutter and Dart.
- Integrating REST APIs, third-party services, and backend systems.
- Converting UI/UX designs into responsive and optimized application screens.
- Debugging issues and improving overall application performance.

Technical Skills

- **Mobile Development:** Flutter, Dart, Cross-Platform App Development
- **Backend & APIs:** REST APIs, JSON Parsing, API Integration
- **Database:** Firebase, Supabase, MySQL, PostgreSQL
- **Tools & Technologies:** Git, GitHub, Android Studio, VS Code, Postman, Figma
- **Deployment:** Google Play Store Deployment, APK/AAB Generation
- **Programming Languages:** Dart, C, C++, Java, SQL
- **Core Concepts:** OOP, Data Structures, Problem Solving

Projects

Split Expenses — Flutter, Firebase	🐙 Play Store
Expense sharing and bill-splitting mobile application published on Google Play Store.	
• Published a Flutter-based expense management application with Firebase backend integration. • Implemented group expense tracking, real-time balance calculation, and transaction history features. • Integrated Firebase Authentication, Cloud Firestore, and FCM for secure real-time user experience.	
MCQ Pro — AI Powered MCQ Platform — Flutter, Supabase, Gemini AI	🐙
AI-powered cross-platform MCQ examination platform for teachers and students.	
• Developed a full-stack Flutter application with Supabase backend and role-based authentication. • Integrated Google Gemini AI for automatic MCQ generation from topics and uploaded PDFs. • Implemented timed tests, real-time scoring, and result analytics with responsive UI.	
InvoiceHub — GST Invoice Management App — Flutter, Supabase	🐙
Cross-platform GST billing and invoice management application for small businesses.	
• Developed a Flutter-based billing application supporting Android, iOS, and Web platforms. • Implemented GST-compliant PDF invoice generation with customer and product management. • Integrated Supabase backend with real-time cloud sync and business analytics features.
